

Participant-level controlled prompt evidence

The study records prompt trials, embedded/reference predictions, saved audio, and bridge-facing logs.

A participant/session pipeline

B intent/keyword/repeat matrix

participants XXX	3 intents	5 keywords	10 repeats
---------------------	-----------	------------	------------

Prompt factors only: participant, intent, keyword, repeat.

C result summary

accuracy	XXX
emergency recall	XXX
unknown false event rate	XXX
embedded/ref. disagreement	XXX

D demo/log evidence strip

Takeaway: participant variability is evaluated through controlled prompts and auditable logs.
